

Michael G. Mino, PE - Principal

Michael Mino is a strategic, technical executive with a strong engineering & manufacturing background. His experience includes Fortune 100 Technology management, hands-on -serial entrepreneurship and academic accomplishment.

Michael founded ORMEC Systems Corporation an industrial automation systems integrator. During his tenure as Executive Vice President and Treasurer, ORMEC was recognized in the Inc Magazine, INC 500 list of the fastest growing privately held companies. He continues as the Vice Chairman of the Board of Directors.

Under his leadership as Executive Vice President and General Manager, Vinton, Inc. separated as an independent entity from its former parent and positioned itself for acquisition by Emerson Electric. During this period he also directed the development of a revolutionary patented plastic welding process.

As Chief Executive Officer for Object Factory, he effected the spin-off of Object Factory from its parent, Advance Automation, Michael then managed the acquisition of the company by Cimatrix, Incorporated.

Michael has taught in the Clemson MBA program and supported the outreach activities of the Clemson Spiro Center for Entrepreneurial Leadership as its Entrepreneur in Residence. Areas of expertise include –

- P&L responsibility for companies and divisions with up to \$35 million in revenues
- Visionary, strategic and technical executive
- Proven catalyst, creating new business opportunities in large and small companies
- Effective integrator of information technology, quality systems and team building
- Strong facility for planning and capitalization, joint-venture and start-up expertise
